Corrigendum: Interspecific comparison of sensitivity to paralytic compounds
Vivian Vy Le, Bryan Sanchez and Ray L Hong

Description
For Le, VV; Sanchez, B; Hong, RL (2019). Interspecific comparison of sensitivity to paralytic compounds. microPublication Biology. 10.17912/micropub.biology.000185

The paralytic in the following sentence is incorrect:
“However, \textit{P. pacificus} seems to recover faster than \textit{C. elegans} after two hours in the presence of ivermectin, suggesting a possible divergence in nicotinic receptors.”

The authors correct the sentence to read:
“However, \textit{P. pacificus} seems to recover faster than \textit{C. elegans} after two hours in the presence of levamisole, suggesting a possible divergence in nicotinic receptors.”

This error has been corrected online.
