Description

For Johnson, CK; Miller, DD; Bianchi, L (2021). Effect of the protease plasmin on *C. elegans* hyperactive DEG/ENaC channels MEC-4(d) and UNC-8(d). microPublication Biology. 10.17912/micropub.biology.000412.

The authors correct the following:

1. The name of the author David D. Miller should read David M. Miller III
2. The affiliations
   1University of Miami
   2Vanderbilt University

are corrected to:

1Department Physiology and Biophysics, University of Miami Miller School of Medicine, Miami, Florida, USA.
2Department of Cell and Developmental Biology, and Neuroscience Program, Vanderbilt University, Nashville, TN, USA.

3. The allele names that were used as reference for the cDNA for *mec-4* and *unc-8* are as follows:
   – MEC-4(d) is MEC-4(A713T), corresponding to allele u231
   – UNC-8(d) is UNC-8(G387E), corresponding to allele n491

4. The reference for the SitePrediction website ([https://www.dmbr.ugent.be/prx/bioit2-public/SitePrediction/](https://www.dmbr.ugent.be/prx/bioit2-public/SitePrediction/)) is added as follows:

These corrections do not alter the conclusions or discussion of this microPublication.
